Summary

Summary

Shirushi Coin (SISC) is the token offered by Shirushi Inc(Japanese Web3 and IoT developer). This token can be used for many various products and services offered by Shirushi Inc. Since it is implemented on the Binance Smart Chain (BSC) and the Ethereum Chain (ERC), there is no need to worry about the reliability of the network.

With this token, you can purchase "Web3 Maker" and mining machines and PC parts sold by Shirushi Inc at a 10% discount.

Shirushi Coin is a revolutionary token that allows you to experience Web3 in real life. In the Shirushi Market (Internet mall where you can buy products with crypto asset for payments), You can purchase at a discount price. And also you can use Shirushi Coin in your daily life at "Shirushi Life". This service can offer you to exchange Shirushi Coin to digital gift cards or digital coupons.

Revolutionary game "Mining Girl" allows players to earn crypto assets as rewards while enjoying the game.

Shirushi Inc is going to continue developping products that will amaze the world. Each time we do so, the value of these tokens will increase.

Utility

Use in Online Shops

Shirushi inc.'s products are sold in our site(<u>https://shirushiminer.com/</u>). This site has a store and machine management functions.

Once this site is linked to customer's Meta Mask (the world's most popular self-custody wallet), it can Identify customers by their wallet address. This site accepts payment by bank transfer, credit card, and crypto assets. If you choose to pay by crypto assets (ETH, BNB, SISC), you can purchase products without using a bank or other financial institution.

Furthermore, if you choose to pay with Shirushi Coins (SISC), you can purchase products at a 10% discount.

Purchased products can be operated in the following two ways.

- (1) Operation by the self customer
- (2) Operation at the data center managed by the Shirushi.Inc

Shirushi Coins can be used not only for purchasing products but also for paying custody fees.

In the future, we will expand the products that can be purchased on this site. Our own products under development, graphics cards, PC parts, etc. will be available for purchase on our own e-commerce site.

Use in Shirushi Market

Shirushi Inc is open an e-commerce mall for crypto asset payments to improve the utility of Shirushi coins. Its name is "Shirushi Market".

Shirushi Market, customers can shop not only with major crypto assets such as BTC, ETH, and BNB, but also with Shirushi Coins (SISC) issued by our company.

When customers make purchases with ShirushiCoin, they can buy products at extremely low prices compared to general ecommerce sites.

Customers can use Shirushi Coins to make purchases because they need to obtain Shirushi Coins in one of the following two ways.

(1) Shirushi Coins buy on the market.

(2) Shirushi Coins Receive by purchasing products from Shirushi Inc.

let's thinking, Regardless of whether the customer obtains the Shirushi Coins by either method (1) or (2), the Company can earn sales and gross profit from the sale of the coins and products, so there is no need to earn a large profit from the products alone.

As a result, customers who use Shirushi Coins to purchase products on the Shirushi Market are able to purchase high quality products at significantly lower prices than the market price.

Use in Shirushi LIFE

Shirushi Inc. is a manufacturing company mainly engaged in research and development of blockchain-related products. We create out-of-thebox products by putting software full of originality on hardware.

Shirushi LIFE" invented by Shirushi Inc, It a product that gives form to our technological capabilities and ideas.

The Company has launched "Web3 Maker," the world's smallest and lightest product that combines token approval functions.

Tokens can be used to store value or exchange goods, but opportunities to use them in real life are currently limited.

If by purchasing our "Web3 Maker" you could receive a digital gift of at least 5 hamburgers each month, you would be able to live by owning and operating our product.

Shirushi LIFE is a revolutionary product that allows you to directly receive various goods and services needed in your daily life.

If the price of Shirushi Coins increases, you will be able to eat 8 hamburgers this month and 10 hamburgers next month.

"Shirushi Market" and "Shirushi LIFE", you can get all the goods and services you need in your daily life if you have Shirushi Coins.

Use in Mining Games

Shirushi Coins popularize , we need more users and holders to see the value and use them.

By producing and offering games with a mining motif, Shirushi Inc will market our products to a customer base that we have not been able to approach until now.

In general, blockchain games are designed to allow secondary distribution by converting the tokens and characters received by playing the game into NFTs.

The above has some problems. In-game tokens can only be used by game users, so the scope of distribution is limited.

Even if a character is converted to NFT, only a very limited number of characters can be traded.

The game "Mining Girl" that we are currently producing has revolutionary specifications that allow users to directly receive ETH, BNB, and SISC by enjoying the game.

You can get money just by enjoying the game. Mining Girl" is a game that can be said to be the true "Play to Earn" game.

Technical Specification

Technical Specification

Token Logo : <u>https://www.coin.shirushi.tokyo/shirushicoin-icon/</u>

Token Name : Shirushi Coin

Token symbol : SISC

Total number of tokens : 100,000,000 SISC

Additional Issuance Amount 100,000,000 SISC (Quantity to be issued by mining)

Valid decimal portion : 8 decimal places

Practicality : 10% discount at the online store operated by Shirushi Inc. Use at Shirushi Market, use at Shirushi LIFE, use as in-game currency operated by Shirushi Co.

Chain Binance Smart Chain https://bscscan.com/token/0x0a23454f4c5d57a020372ab7138d80b43da95c3e Chain ERC-20 Etherscan https://etherscan.io/token/0xc7ac64b37f93b90aa3a7809d35d8771de18ab71e

Core Members

Core Members

Manabu Sakurada (Representative Director and CEO)

Responsible for planning and directing this project. He is mainly active in the financial industry. He has held management positions in Japanese listed online securities, FX companies, and He has held management positions at a Japanese listed online securities company, an FX company, and a crypto asset company. He has also served as a board member of a financial publishing company. He has been deeply involved in the company since its inception and has established the business foundation in Japan.

Naoki Okura (President, COO and CTO)

Engineer in crypto assets and hardware Engineer in the technology and financial industry career in the technology and financial industries. Start-up member of a Japanese crypto asset exchange and worked on licensing as a founding member of a Japanese crypto asset exchange. With his wacky ideas and forward-thinking spirit, he continues to develop innovative products and leading the development of future technologies.

The maximum supply of Shirushi coins $(1) \sim (4)$ is 200 million (100 million initial issue and 100 million additional issue). The initial issuance will be used to provide liquidity, investor ownership, marketing costs, and development costs. The additional issuance will be issued and supplied by mining

[Initial Offering]

(1) Liquidity supply ... 10%
(2) Investor ownership ... 70%
(3) Marketing costs ... 10%
(4) Development costs ... 10%
(Additional Offering)
(1) Supply by mining... 100%

[Initial Offering]

(1) Liquidity Supply - 10%.

This is the percentage of tokens used by investors for market making and liquidity pooling to ensure stable trading on the exchange.

(2)Investor ownership ... 70% ...

Percentage of coins offered to initial investors.

Tokens purchased on the exchange are rarely sold in the first place, as they are transferred to Shirushi Inc for the purchase of goods and used for settlement. In addition, when sales of our mining-related products occur, Shirushi Inc. purchases a certain amount of Shirushi coins on the market, which is a major buying factor in the rise of Shirushi coins. As a result, investors are more likely to use the coins than to own them in the hope that they will increase in value.

(3) Marketing costs . .10%.

To cover audit and legal fees incurred in connection with the release of this coin, listing costs, and public relations expenses to raise awareness of ShirushiCoin.

(4) Development costs ... 10% ...

This percentage of the Coins will be used to pay for the development of cutting-edge technologies such as software and hardware. The value of the Coins will increase dramatically with the development and success of the following technologies.

* Software

Shirushi Inc, working to reduce the size and power consumption of its products and is developing a product that will allow IoT devices to be equipped with a token generation function and that will work on human reward circuits by receiving tokens and is developing software to be used in this product.

* Hardware technology

We are developing original products with a token generation function that do not exist anywhere else in the world. We are developing thermometers and hygrometers with a token generation function, drones, and IoT devices with a voice reading function. We will combine blockchain technology and IoT to develop new products that have no name in the world. We are also embarking on research and development of quantum computers.

* Materials Technology

Our materials are used in the research and development of semiconductor materials that improve computer performance and materials suitable for cooling and power saving.

* Energy Technology

This technology will be used for the development of green energy generators and devices focusing on power saving.

[Additional Offering]

(1) Supply by mining - 100%.

Shirushi Inc launched the world's smallest and lightest mining machine, Shirushi Miner, in November 2022.

The product has been approving and processing (mining) new token issuances since November 1, 2022, with 20,000 Shirushi Coins paid daily in the first year as compensation for processing on Shirushi Miner.

The supply will increase as additional Shirushi coins are issued, but Shirushi miners have a mechanism to absorb the increase in supply caused by additional issuances, since the more Shirushi coins are sold, the more Shirushi coins are bought.

In the future, by diversifying and collaborating on products for sale, it will become easier to purchase tokens than to sell machines alone, allowing users to receive tokens without being aware that they are purchasing a mining machine.

Advantages of first-mover

Decreased mining volume

SISC mining volume is going to decrease by 10% per year.

Road Map

Year 2022

• We opened an online store where you can purchase with Shirushi Coin.

• The world's smallest and lightest weight mining machine "Shirushi Miner" was finished developing and sold.

• Development of IoT devices with token generation function is launched.

Year 2023

• We are going to start sales of Web3 Maker" to convert any device that was not connected to the blockchain and the Internet to IoT \times (1).

• We will develop and sell a new product "Shirushi to Earn" with token generation function.

• We will start sales of "Shirushi Market", an ecommerce mall that enables crypto asset settlement.

• We will start "Shirushi LIFE", which allows users to directly receive various goods and services needed in daily life.

 \cdot We will develop and sell "Token Generation," a business-card sized. $\times @$

Year 2024

• "Mining Girl", the next generation blockchain game is going to Release.

 OEM provision of "WEB3 Maker", a next-generation IoT device, to other tokens

 Quantum computers using mining , Development and release of new coins dedicated to quantum computers

Expression of Gratitude

Thank you very much for reading this report.

We are looking forward to your continued support of Shirushi Coin (SISC) .
